

CAREER MOVES: SKILLS FOR THE JOURNEY

Perimeter Institute for Theoretical Physics Presents...

Full-day Workshops for Physics Teachers

Featuring Two New Free Resources:

The Process of Science and Career Moves

These full-day workshops will be packed with hands-on activities and minds-on discussions that will provide you with loads of ready-to-use lessons that will help support Unit A: Scientific Investigation Skills and Career Exploration in grade 11 and 12 physics. It will explore such things as getting students to ask questions like scientists and to compare competing models. You will see how you can show them why physics is important for students interested in medicine, law and business!

The workshop will focus on physics examples, but the resources contain lessons that are perfect for the grade 9 and 10 science courses and the grade 10 careers course. Each teacher will receive extra copies of each resource so they can share these with the non-physics teachers in their school.

Each participating teacher will be provided with supply coverage for the day and lunch. Spaces are limited, so contact the presenter to sign up today!

1) Wed. Oct. 23 **Toronto** **9:00 - 3:00**
Danforth Collegiate Institute, 800 Greenwood Ave, Room A76
Presenters: Roberta Tevlin and Tim Langford
Sign up: roberta.tevlin@tdsb.on.ca

2) Fri. Nov. 1 **Uxbridge** **8:45 - 2:45**
Uxbridge Secondary School, 127 Planks Lane, Library
Presenters: Lisa Lim-Cole and Jane Kennedy
Sign up: Lisa_Cole@durham.edu.on.ca

3) Wed. Oct 30 **Waterloo** **9:00 - 3:00**
Perimeter Institute, 31 Caroline St. North, Room TBA
Presenters: James Ball and Olga Michalopoulos
Sign up: **FULL**

4) Fri. Dec. 13 **Brampton** **9:00 - 3:00**
North Park Secondary School, 10 North Park Drive, Room TBA
Presenters: Sara Naudts and Greg Macdonald
Sign up: saara.naudts@icloud.com
