

All of these are to be “integrated” with a “Business as Usual” model.

Mandatory education for all about the science  
of climate change

Mandatory use of public transportation

Ban on the importation of food grown, or  
farmed, more than 200 km away

Maximum weekly electrical consumption limit  
imposed on households

Ban on all disposable plastic products, or other disposable products made from fossil fuels

Mandatory plumbing refurbishment directing waste sink water and waste shower water to toilets. Maximum water consumption per household also enforced.

Ban on all meat products, and farm animals, from being sold to lower methane released to the atmosphere.
